PA, Art & Lighting Dept Fox Hunt Drive (REBL HQ) 2018

Photographer, Monarch Habitat Event (Full Sail) 2018

Graphic Designer, Panic! Album Cover (Voiceplay) 2018

## PROFESSIONAL EXPERIENCE:

CORGI MAFIA BRAND 2017 - PRESENT

Lead Graphic Designer

Corgi Mafia Merchandising Brand represents the love for stumpy dogs all over the world, from T-shirts to leggings to hats and other puppy merchandise. With a graphic and edgier design style Corgi Mafia seeks to appeal to those dog lovers with a fashion sense that is not of the norm.

There was a TV show that aired on the BBC network in 2017, it was one of my favorite shows "Dirk Gently Holistic Detective", it aired for two seasons before it was mysteriously canceled. In this show amongst the main characters there was a pet actor, a corgi named "Bentley".

After the first season I began creating fan art based on the show and posting them on my Instagram account. Not too long after I was contacted by the owner of Bentley who asked if I could send him some of my designs so that he could hang them on his walls, of course I said yes.

After months of sending art to him he asked if I could help him with certain projects, which of course I did. Eventually he contacted me and asked me if I would help him to create and run a clothing and merchandise company created specifically for Corgi lovers. He asked if I would be Creative Director, coming up with and creating all of the designs for all of the merchandise as well as the web site. Most if not all the designs are made standardly either thru Illustrator or Photoshop, other designs were hand drawn or painted. I enjoy mixing mediums as much as possible.

VOICEPLAY 2018 - PRESENT

BTS Producer, Director & Editor

Original. Imaginative. Ridiculous. A Cappella. The cast of VoicePlay has taken the timeless sound of vocal music and turned it completely on its head. Re-imagined as a full stage show, amazing, humorous, and vertigo-inducing harmonies pepper VoicePlay's music-without-music sound.

My main responsibility is to develop, film and produce video content for them to use for their Patreon/Subscribers, as well as sometimes helping to develop any graphic needed for videos and social media; as well as album covers.

When it comes to filming I am responsible for deciding what the theme of the BTS video will be, filming and gathering all the footage. I then ingest everything and edit it all down to an easily consumable 7 to 10 minute video.

Other times I am responsible for developing Graphics/Titles and Designs for film & social media using Illustrator/Photoshop. Last but not least I create in the moment content that can be easily dropped to social media. I usually use photography for a lot of these pieces, taking a themed photo and then adding whatever is needed graphically.
